Our Commitment to Active Management

At William Blair Investment Management, clients turn to us for an enhanced approach to active management. This approach helps us as we seek to deliver consistent, long-term alpha by actively taking compensated risks and avoiding uncompensated risks.

Our Active Approach

No single data point can come close to telling the full story of William Blair Investment Management's approach to active management.

Our approach consists of autonomous teams with shared values operating in an environment in which investment professionals can thrive. A strong foundation gives each team the freedom and resources to engage in high-conviction investing in the pursuit of alpha. Each of our four investment teams defines "active" differently within their strategies.

Moreover, at William Blair Investment Management, active management is much more than an investment approach. While stability has been at the core of our existence since our founding in 1935, our active ownership culture promotes a dynamic environment in which our business and investment processes continuously evolve with a constant focus: Align with clients' interests and help them achieve successful investment outcomes.

Consistent with our active approach, we integrate key environmental, social, and governance ("ESG") considerations into our investment processes. We believe that integrating targeted, financially material ESG factors alongside traditional financial metrics in our fundamental research helps us make a more holistic assessment of investment risks and opportunities and is commensurate with the pursuit of superior risk-adjusted returns on behalf of our clients. Additional details on our approach to ESG integration are available in our [ESG Policy](#).

Our Strategies

We offer a wide range of strategies across vehicles, including separately managed accounts, collective investment trusts, mutual funds, and Luxembourg-domiciled UCITS funds.

An important aspect of William Blair Investment Management's positive reputation within the investment community is its approach to new business and asset flows. We diligently monitor the capacity of our strategies and act proactively to address potential capacity issues before they affect the integrity of portfolios and long-term performance—and we have proactively closed certain flagship strategies to maintain the integrity of portfolios and avoid any resulting impact on long-term performance.
